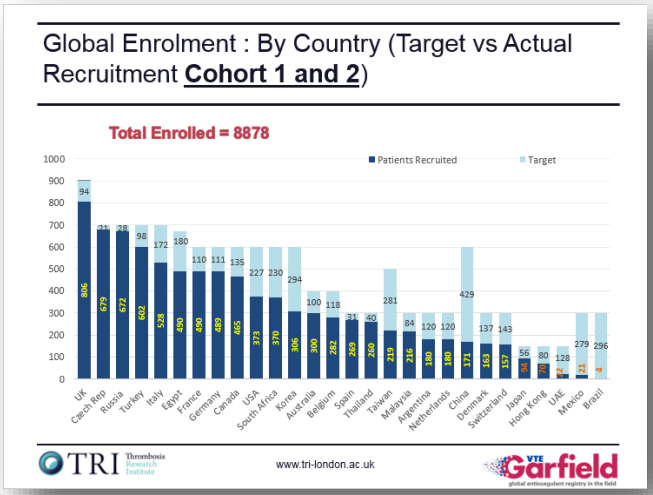
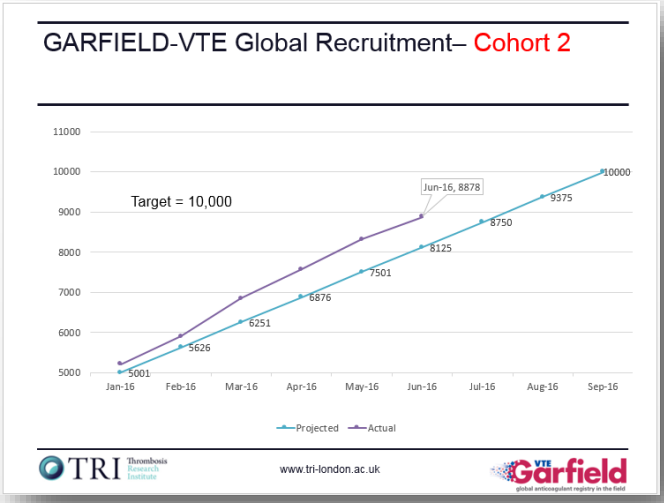
# Global News and Announcements

## Overview

A huge thank you to all our NCIs who have helped and provided solid support throughout Cohort 2—much appreciated. As we are approaching our 10,000 target—we are gearing up for exciting new ventures in the near future. We are also currently looking into the feasibility of a meeting in Mexico City for our Latin American sites, possibly later in the year.





## Recruitment

Cohort 2 recruitment is progressing very well and ahead of our projections—all thanks to you. To date, we have recruited 8,878 patients. We have recruited 89% of our target and we kindly please ask you to continue to encourage the investigational sites in your country so as to not slow down in this summer period because it is a crucial period in recruitment

## Thank you....

June has been a busy month with lots of logistics being worked on, future plans discussed, in addition to processing the June site payments. We appreciated your help in encouraging the sites in your respective country to complete the data cleaning in time for this milestone.
